Professional Summary

Software Development Engineer specializing in Generative AI, Agentic AI, and enterprise software development. Experienced in building LLM-powered applications, AI agents, RAG-based semantic search systems, workflow automation, and scalable backend services with Python, FastAPI, SQL, and data engineering pipelines.

Technical Skills

Languages: Python, Java, SQL, JavaScript, C++
GenAI & Agentic AI: LLMs, AI Agents, RAG, Prompt Engineering, NLP, Semantic Search
Machine Learning: Scikit-learn, TensorFlow, PyTorch, Deep Learning, OpenCV, YOLOv8
Backend: FastAPI, Flask, REST APIs, Microservices, Node.js, React, Streamlit
Data Engineering: ETL Pipelines, Data Validation, Data Migration, Incremental Loading, SQL Optimization
Databases: Oracle, Google BigQuery, SQL Server, MySQL, SQLite, Dataverse, Gremlin
Cloud & Tools: Azure, Databricks, GCP, Docker, Git, CI/CD, Power BI, Copilot Studio, Power Apps, Power Automate

Professional Experience

Lumen Technologies **Aug 2025 – Present**
Software Development Engineer – AI & Data Science

- Engineered an **AI-powered Project Intelligence Agent** (**Python, FastAPI, RAG**) that identifies similar Jira stories, recommends reuse vs. new story creation, automates story generation, and keeps **living project documentation** synchronized with Jira.
- Built an **executive project intelligence agent** in **Microsoft Copilot Studio** that analyzes fragmented Excel status trackers and gives VPs and Senior Directors conversational insights into progress, milestones, and risks.
- Built an **AI Scrum Master platform** with role-based dashboards, **LLM-powered standup summarization**, **semantic duplicate detection**, blocker identification, and sprint health insights.
- Developing an **end-to-end order processing automation** for Project Coordinators on the DCOT platform, extracting order details from SWIFT, GLM, DTA, Laser, and attachments, saving an estimated **10+ hours per week**.
- Automated **Jira user story creation** from meeting transcripts using LLM summarization and extraction, reducing sprint planning overhead by **2 hours per sprint**.
- Built **Power BI dashboards** and **workforce analytics pipelines** covering resource utilization, sprint velocity, and productivity, reducing manual reporting by **2–5 days per month**.
- Developed automated **ETL pipelines for Jira data synchronization** using incremental loading and backfilling, enabling reliable analytics and AI-powered engineering knowledge retrieval.
- Implemented **Oracle-to-Google BigQuery ETL pipelines** with multi-point validation, nested JSON parsing, and query optimization, achieving **100% data parity**.
- Architected data pipelines integrating **Oracle, BigQuery, Gremlin Graph Database, and SQLite** to support dependency analysis and root-cause investigation of application and database outages.
- Built an **AI scheduling assistant** using NLP and LLM reasoning over calendar data to resolve conflicts and recommend focus time, saving **12+ hours per week per user**.

Lumen Technologies **Feb 2025 – Aug 2025**
Software Development Engineer Intern

- Designed **AI agents** in **Microsoft Copilot Studio** to automate enterprise workflows, saving over **500 team hours annually**.
- Developed a **quote classification and promotion recommendation system** (Python, FastAPI, Flask, ServiceNow APIs), saving **8 hours/week** in manual review.

Projects

DataLens AI *Python, Streamlit, Machine Learning, NLP*

- Built an AI platform automating ML workflows (data prep, training, evaluation, visualization) with a chatbot for natural language dataset exploration.

Automatic Driving Test Tracker *Python, Flask, OpenCV, YOLOv8*

- Developed a real-time computer vision system using YOLOv8 and OpenCV to automate driving test evaluation, achieving 95% detection accuracy.

Education

Keshav Memorial Institute of Technology **Jul 2021 – Jul 2025**
B.Tech in Computer Science and Engineering (AI & Machine Learning) CGPA: 8.60/10

Indian Institute of Technology Madras **Sep 2022 – Dec 2025**
Diploma in Programming and Data Science GPA: 6.55/10

Achievements & Publications

- Winner – Lumen Quest Hackathon 2025; Second Prize – Anurag University Hackathon.
- Indian Patent: Interface for Lip-Reading and Lip-Synchronization using Deep Learning (2025).
- Research paper published in *Mukt Shabd Journal*, April 2025.
- Solved 500+ DSA problems on LeetCode.
